Weapon Descriptions

Disintegrator Rifle: A rifle that resembles a laser rifle, however this weapon is far more devastating. Targets hit by a shot from a disintegrator must make an immediate saving throw (vs. Physique) or be killed. Any target that is able to make their saving throw, takes half of their remaining hit points as damage.

Disk Gun: This rifle like device fires small razor sharp disks. The action of this gun is silent, so this weapon is favored by those requiring stealth.

Flamer Pistol: A heavy pistol able to fire a burning jelly-like chemical that sticks to a target causing more damage each round a target is inflamed. The initial hit causes 1d6, the next round 2d6, and the 3rd round 3d6 (and each round after until dead or extinguished).

Flamer, Heavy: A heavy rifle with a tank atop that functions much like a flamer pistol. The rifle is more deadly as it puts even more burning jelly on it's target, the first round of contact caused 3d6 damage and increases by 1d6 each round to a max of 6d6 damage.

Grenade, Fragmentation: A 40mm explosive grenade that sends deadly shrapnel in a 10m radius. These come as a shell for a launcher or a ball shaped charge for throwing.

Grenade Launcher: This weapon is usually mounted to a rifle or assault rifle and fires single grenades. There is a shoulder fired version that does not need to be mounted on a rifle, this version is single shot – breach loaded.

Grenade, Sleeping Gas: A 40mm grenade that sends a cloud of sleeping gas in a 5m radius. Anyone not protected by a re-breather or gas mask must make a saving throw (vs. Physique) or immediately collapse into a sleep-like state for 2d6 rounds. This grenade is available as a shell for launching, or a ball-like grenade for throwing.

Grenade, Stun: A 40mm grenade that explodes with a flash of bright light and loud stunning noise, anyone within a 5m radius must make an immediate saving throw (vs. Physique) or be stunned and unable to take action for 1d6 rounds, and must fight at -2 for another 1d6 rounds after the initial stun. This grenade is available for launchers, and a ball-like grenade for throwing.

Laser Weapons: These light weight weapons fire a charged particle beam of light capable of punching through most armor.

Laser, Pulse Rifle: Like a laser rifle, except this weapon fires bursts of charged particles

Mini-Rocket Launcher: A shoulder or wrist mounted rocket launcher capable of firing multiple rockets (small 20mm rockets).

Mini-Rocket, Fragmentation: A small 20mm rocket that explodes hurling deadly shrapnel in a 5m radius.

Needler Weapons: A small light weight gun capable of firing small deadly-sharp needles at high speed. These weapons are silent and a preferred weapon of assassins. The needles can be coated with a deadly toxin only available from the black market.

Plasma Weapons: These weapons fire a super-heated, electrically charged ball of gas. These weapons are capable of causing tremendous damage.

Slug Throwing Weapons: These are the equivalent of modern day firearms, firing standard 10mm bullets.

Sonic Stun Rifle: This rifle fires a beam of sonic energy at the target causing 1d6 actual damage, as well as stunning the target for 1d6 rounds.

Tangler Rifle: This rifle fires a round of a chemical compound that sticks like webs to a target. A successful hit requires the target to make a saving throw (vs. Physique) or become immobilized.
